Pascaline

In about 1642, Blaise Pascal, a French mathematician and philosopher, developed a calculator called the 'Arithmatique' or 'Pascaline'. It was also called the 'numerical wheel calculator' and was one of the world's first mechanical adding machines. Pascaline used a series of toothed wheels for calculation, which were turned by hand and could handle numbers up to 999,999.999. When a gear with ten teeth made one rotation (tens), a second gear shifts one tooth until that gear rotated ten times (hundreds), then shifts another gear (thousands) and so on. This principle is still used in odometers in cars, pumps of petrol stations, and electricity meters at home.

CHAIRMAN'S MESSAGE

Yousuf Hussein Kamal
Minister of Finance
Acting Minister of Economy and Commerce
DSM Chairman

Doha Securities Market (DSM) underwent important stages of development throughout the last three years. Each stage was marked by distinguished characteristics that, at the end, resulted in an atmosphere filled with confidence, stability and fairness.

The characteristics were apparent during 2007, as the companies listed on DSM demonstrated complete compliance with the DSM Internal Regulations, especially after they were revised to further enhance transparency and disclosure. The year 2007 witnessed a considerable reduction in speculation practices and saw the active performance of substantially sized mutual funds, which positively contributed towards the stabilization of share prices in the market, as scientific approaches were employed to judge fluctuation movements.

Leading on from this point, we would like to point out that the gradual progress in market index, coupled with the increase in the value and volume of trading in 2007, were instrumental in garnering the trust required to

establish a solid foundation for the next stage. This trust has been further boosted by the sound growth the Qatari economy is presently witnessing under the visionary leadership of H.H. Sheikh Hamad Bin Khalifa Al-Thani, the Emir, and H.H. Sheikh Tamim Bin Hamad Al-Thani, the Heir Apparent.

We are looking forward to and are striving for another year filled with optimism and are determined to exert the combined efforts of the Market Committee and the Management, the Listed Companies, the Brokerage Firms, the Investors, and the Media towards positioning the Qatari Stock Exchange as one of the most vibrant and pioneering global stock exchanges, that adequately reflects the true progressive image of our beloved country.

Napier's Bones

Napier's Bones, is considered to be a clever multiplication tool that was invented in 1617 by renowned mathematician John Napier of Scotland. The bones are a set of vertical rectangular rods, each one divided into 10 squares. The top square contains a digit and the remaining squares contain the first 9 multiples of the digit. Each multiple has its digits separated by a diagonal line. When a number is constructed by arranging side by side the rods with the corresponding digits on the top, then its multiple can be easily obtained by reading the corresponding row of multiples from left to right while adding the digits found in the parallelograms formed by the diagonal lines.

GLOBAL STOCK EXCHANGES

Year 2007 witnessed a slow down in the growth of the global economy. Higher oil prices, fluctuating financial markets and continuing inflation were the key factors that collectively contributed towards this stunted growth. The slow down of the global economy was also influenced by the slow pace of growth of the US economy. The US economy was hit by a mortgage default crisis in the subprime sector which led to billions of Dollars in losses. Despite the depressed growth, all the major Global Stock Exchanges (GSE), with the exception of the Japanese NIKKEI, witnessed an increase in the performance price index levels of their shares. The illustration and table below depict the performance of the seven major global stock exchanges in 2007.

In Frankfurt, Germany, the DAX 30 Index, one of the major European Stock Exchanges outperformed its peers and was ranked as the highest among the seven major global stock exchanges. It closed 2007 at 8,067.32 points compared to 6,596.92 points in 2006, an increase of 18.23%. In London, the FTSE 100 Index closed at 6,456.90 points, an increase of 3.66% compared to the previous year's closing. In Paris, the CAC 40 Index closed 2007 with a gain of 1.29% to reach 5,614.08 points compared to 5,541.76 points in 2006.

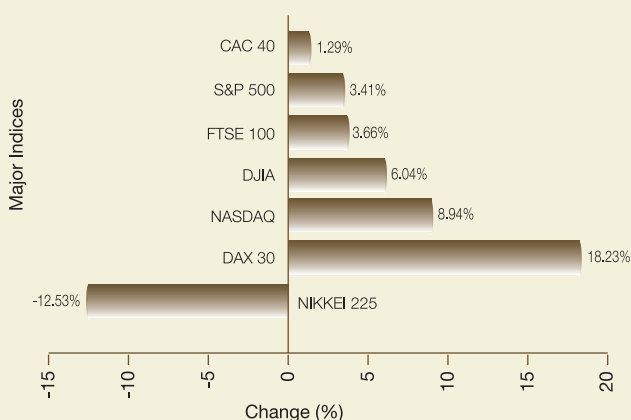

Despite the credit crisis in the US, the recent hike in oil prices, the sharp decline in the manufacturing sector, the weakness of the US Dollar against the Euro, and the steep rise in inflation, which pushed the US economy to the brink of recession, the three main financial market indicators in the United States ended the

year 2007 with an upward swing. The Nasdaq Composite gained 8.94% and closed at 2,652.28 points in 2007 compared to 2,415.29 points in 2006. The Dow Jones Industrial Average (DJIA) moved in similar fashion and closed the year with 13,264.82 points, an increase of 6.04%. The broader-market Standard and Poor's (S&P) 500 also closed the year on a higher level - 3.41% or 1,468.36 points.

The Stock Average of 225 companies listed on the Japanese NIKKEI stood in the negative territory in 2007 reporting a steep loss of 12.53% and closed at 15,307.78 points, its first losing year in the last five years. The sizeable loss in the price index of the NIKKEI 225 was primarily attributed to the surge in the Yen, which eroded the value of earnings from foreign markets.

(Table 1)

GCC AND ARAB STOCK EXCHANGES

The year 2007 can be termed as the 'renaissance year' for the GCC and Arab Stock Exchanges, as they accumulated remarkable gains on their performance indicators, after a drastically poor performance in 2006. Many factors collectively contributed to this remarkable turnaround. Key among them were: the steep rise in oil prices which had a positive impact on the economies of oil producing countries; the entry of new investors into emerging markets, especially after they were severely hit by the substantial losses encountered alongwith the mortgage default phenomenon in the US subprime sectors; and the preference mutual funds managers and investors showed towards investing in the emerging Arab Stock Exchanges, given the fact that stock prices suffered their worst slump in comparison to their main indicators resulting in enticing foreign investors to invest in low stock prices.

In 2007 most of the Gulf and Arab Stock Exchanges exhibited a substantial rise in the performance of their stock indices, either in terms of value or percentage changes. Muscat Securities Market, whose index climbed by a remarkable 61.88%, was the star performer of the region. Ranked second was Abu Dhabi Securities Market, which registered an impressive increase of 51.74%. Cairo and Alexandria Stock Exchange with 51.29% and Dubai Financial Market with 43.72% came third and fourth

respectively. Saudi Stock Market occupied the fifth position with 40.87%, followed by Iraqi Stock Exchange with 36.78%, Amman Stock Exchange with 36.26%, Doha Securities Market with 34.31%, Casablanca Stock Exchange with 33.92%, Beirut Stock Exchange with 26.17% and Kuwait and Bahrain Stock Exchanges with 24.75% and 24.25%, respectively. Tunis Stock Market gained only 21.12% in 2007 and was ranked at the bottom of the chart.

On the other hand, both Khartoum and Palestinian Stock Exchanges moved in the opposite direction, registering a decrease of 0.36% and 12.85%, respectively.

The performance of Doha Securities Market (DSM) progressed steadily during 2007. Optimism was the driving force which nourished all its indicators after a dismal performance that lasted for 16 consecutive months. The steady progress in 2007 can be largely attributed to the following key factors:

The accumulated 3rd quarter corporate profits reported by the listed companies revealed a 37.5% increase compared to the same period in 2006. An extensive knowledge base in combination with the know-how of the investors worked alongside a very close monitoring of the price volatility in the market to yield these results. This phenomenon was particularly proven during the issuance of the IPO's of Al Khaliji Bank and Qatar Oman for Investment Company, as the market didn't witness any abnormal liquidity waves during this period as observed in the past. Furthermore, the market index did not suffer severe losses in its points, especially

when a new IPO entered the market. Moreover, the market did not observe any extraordinary oversubscription, as evidenced by the IPO of Al Khaliji Bank which was oversubscribed by only 2.25 times despite the attractiveness of the banking sector to a vast number of investors.

DSM Trading Activities

The year 2007 was marked by a string of healthy performances in all of DSM's trading indicators. The aggregate value of shares traded in 2007 climbed by a remarkable 45.36% reaching QR 108.9 billion compared to QR 74.9 billion recorded in 2006. The total number of shares traded during the year increased by a phenomenal 82.87% reaching 3.41 billion shares compared to 1.87 billion shares traded in 2006 and the total number of executed transactions during 2007 reached 1,811,779, an increase of 4.57% over the 2006 figure of 1,732,638 executed transactions.

Value of Shares Traded (2003-2007)

(Illustration 3)

MARKET PERFORMANCE

Sectoral Activity

In terms of value of shares traded, the Banking & Financial Sector was the most active sector during 2007. The value of shares traded in the Banking & Financial Sector reached QR 45.5 billion accounting for 41.75% of the total value of shares traded, followed by the Services Sector with a value of QR 43.8 billion representing 40.25% of the total value of shares traded. The Industrial Sector ranked third with its value of shares traded amounting to QR 16.2 billion or 14.87% followed by the Insurance Sector with a value of QR 3.4 billion, which accounted for 3.13%. (Refer to Illustration 4 below.)

Market Capitalization

At the end of the year 2007, the total market capitalization had reached QR 347.7 billion, a remarkable increase of 56.81% compared to QR 221.7 billion recorded in 2006. The significant increase in market capitalization in 2007 can be largely attributed to the increase in share prices of 32 of the 40 companies listed on DSM. Moreover, the listing of 4 new companies, which accounted for more than 8% of the total market capitalization, contributed an additional QR 30.3 billion to the total market capitalization.

Sectoral Activity

(Illustration 4)

MARKET INDEX

At the end of 2007, the DSM Price Index had increased by 34.31% compared to 2006. The index started the year slightly above 7,000 points, then gradually dropped during the first quarter, registering its lowest level of 5,944.03 points on April 4th. The index recouped throughout 2007 reaching its highest level of 10,057.59 points on November 5th, before dropping slightly at the end of the year to 9,580.45 points.

In terms of sectorial index, the industry sector gained the highest percentage with 72.37% followed by the services sector with 29.69%. The banking & financial sector ranked third with 26.93%, followed by the insurance sector with 25.03%. (Refer to Illustration 5.)

(Illustration 5)

NEW LISTINGS

The year 2007 saw four new listings at DSM. Subsequent to the listing of four new companies, the total number of listed companies at DSM increased to 40. The names of the four newly

listed companies, their listing dates and the number of subscribed shares are shown in the table below.

COMPANY NAME	LISTING DATE	NO. OF SUBSCRIBED SHARES
Al Khaliji Commercial Bank	August 1, 2007	720,000,000
Al Mannai Corporation	August 8, 2007	12,000,000
A'amal	December 5, 2007	345,000,000
Qatar Oman Investment Company	December 12, 2007	30,000,000

(Table 2)

NEW ISSUES

The year 2007 witnessed the tapping of the primary market at DSM with the issuance of new securities amounting to QR 10.7 billion, thereby injecting the supply side with approximately 787.6 million shares. Five new issues (IPO's & Rights Issue) were undertaken during 2007.

Three out of the five new issues were in the form of Rights Issue to existing shareholders and was aimed at raising capital to the tune of QR 3.2 billion (Table 1). The other two new issues, with a total amount of QR 7.5 billion (Table 2), were for newly established companies (IPO's).

(Table 2)

MARKET ACHIEVEMENTS

In an effort to achieve its pre-determined goals and to continue contributing to the growth of the national economy, Doha Securities Market (DSM) continued its endeavour to ensure the highest levels of fairness in all its dealings. DSM continues to seek for ways and means to further develop its legislative framework and market practices, particularly in the areas of transparency, disclosures and investor awareness. In this regard, DSM embarked on a number of initiatives during 2007, including seminars, workshops, publications and radio announcements. Mentioned below are some of the major achievements of 2007.

New Listings of 2007

The DSM Management approved the listing of four new companies in 2007. Among the four, two were newly established companies and two were companies that transformed from private into public shareholding companies. The four newly listed companies are:

- Gulf Commercial Bank (Al Khaliiji)
– Listed on August 1, 2007
- Mannai Corporation
– Listed on August 8, 2007
- A'amal
– Listed on December 5, 2007
- Qatar Oman Investment Company
– Listed on December 12, 2007

Market Committee Resolutions

The DSM Committee issued a number of resolutions during 2007 in order to develop the market practices and legislative framework. Below is a summary of some of the important resolutions that were adopted in 2007.

Amendments to DSM Internal Regulations

- A new paragraph has been added to Article (48) of the DSM Internal Regulations that requires managers of joint-stock companies to hold explanatory press conferences for the purpose of addressing the questions and comments raised by the investors, journalists or any other concerned parties with respect to the information and figures reported in the semi-annual financial statements furnished by the listed companies.
- Amendments to Article (51) of the DSM Internal Regulations that requires each listed company to publish a sufficient summary of their quarterly and semi-annual financial statements and reports in two local daily newspapers, one of which will be in English, if foreigners are permitted to trade in the securities of the Company. These reports should also contain the projects and activities of the Company's subsidiaries.
- Approval to publish information about the 'insider trading' of the Chairman, Board Members and Executive Managers of the listed companies regarding their trading on DSM monitors, other terminals and on DSM website without publishing their names.

DSM continued its endeavour to ensure the highest levels of fairness in all its dealings.

MARKET ACHIEVEMENTS

- Amendments to Article (37) of the DSM Internal Regulations in order to stipulate the following:

Each Qatari joint-stock company whose subscribed capital is at least QR 40,000,000 (Forty million Qatari Riyals) or equivalent shall apply for listing its shares on the Market within one month from the date of the meeting of the General Assembly during which the establishment of the Company was finally approved.

- Amendments to Paragraph (1) of Article (38) of the DSM Internal Regulation regarding the listing requirements at DSM. The new amendments include the following:

The number of shareholders shall not be less than thirty, subject to the following:

1. If the number of shareholders falls below 30 and remains above 15, the Company shall be notified to reconcile its position by increasing the number to 30 within one month. If the Company fails to comply with this requirement, trading of its shares will be suspended.
2. If the number of shareholders fall below 15, trading of the shares of the Company shall be suspended immediately, even if it occurs during the one-month period allowed. The suspension shall continue until the Company reconciles its position by increasing the number of shareholders to 30.

3. The shareholders of a company that has been transformed to a joint-stock company without offering its shares for public subscription and who are registered in the registry of the Market on the day its shares are traded thereon shall not dispose 50% of their shares for a period of two years from the date of listing the shares of the Company.

- Continue to utilise the current DSM 20 Index formulation as it adequately reflects the market fluctuations, and maintain the current applied methods for entering and removing companies in the Index as well as excluding the shares of the government, founders and board members from the Index. In addition, adjustments to the Companies entered into calculating the index sample were made on September 1, 2007.

- If an official holiday falls during the period required for a listed company to submit its quarterly financial reports, then the deadline for submitting the quarterly financial reports will be shifted by the number of holiday days.

Promoting Investment Awareness

During 2007, DSM exerted its best efforts to strengthen the investment environment, enhance awareness and protect the investing public. Mentioned on the following page are some of the activities that were carried out by DSM in 2007:

During 2007, DSM embarked on a large number of initiatives including seminars, workshops, publications and radio announcements.

MARKET ACHIEVEMENTS

Seminars and Lectures

During 2007 DSM made remarkable strides towards helping the investing public to make educated and informed investment decisions. In this regard, DSM participated in a number of workshops, seminars and conferences during 2007. Mentioned below are the highlights of the seminars conducted in 2007:

- Seminar on Corporate Governance: The seminar was held on the 30th and 31st of January 2007.
- Seminar on Investment Basics, Technical Analysis and Trading Strategies: The seminar was held on February 6, 2007.
- Seminar on Transparency and Disclosure of Financial Statements: The seminar was held in co-operation with the Qatari Scientific Assembly of Accounting at Qatar University on May 16, 2007.
- Workshop on Combating Money Laundering: The workshop was held on the 6th & 7th of July 2007.
- Conference on Mutual Funds: The conference was jointly organised by DSM, Qatari Businessmen Association, Ministry of Economy and Commerce, Qatar Central Bank and Qatar Financial Markets Authority and was held on the 26th and 27th of November 2007.
- DSM participated in selected lectures such as a lecture on 'Investing at Doha Securities Market' organised by Ammnna Bin Wahab High School.

Co-operation with Institute of Higher Education

DSM welcomed a large number of students from Qatar University to a field trip training programme that lasted for two months. The programme was aimed at introducing students to the stock exchange activities in the State of Qatar and to the role DSM is playing in the development of the national economy.

Co-operation with Qatar Radio Broadcast Station

Doha Securities Market, in co-operation with Qatar Radio Broadcast Station, agreed on transmitting weekly trading reports that reflect DSM's weekly trading activities.

DSM Publications

- DSM Magazine
 - Al Souq, published on a monthly basis.
- Monthly Bulletin, published every month.
- 2006 Annual Report.
- 2006 Investors' Guide.

Qatari Capital Markets Day in London

The 'Qatari Capital Markets Day' that was held in London on November 2, 2007 and was jointly organised by DSM and London Stock Exchange (LSE) yielded success levels that exceeded expectations. The event witnessed the participation of a large number of representatives from various financial investment institutions, fund managers and Qatari listed companies.

In 2007, DSM, in an effort to introduce students to the stock exchange and its activities in the State of Qatar, welcomed a large number of students from Qatar University to a field trip training programme that lasted for two months.

MARKET ACHIEVEMENTS

The event presented a fantastic opportunity to raise funds, attract foreign investments and expand the global investors base to include world-class global investment institutions and thereby consolidate DSM's position and enhance its identity globally.

Joining the World Federation of Exchanges (WFE)

The World Federation of Exchanges accepted Doha Securities Market as a Correspondent Member of the Federation during its annual Board of Directors' meeting which was held in Shanghai, China on October 14, 2007.

Development of DSM Website

The significant increase in the number of investors coupled with the increase in demand for faster and easier access to comprehensive information have resulted in updating the DSM web page. The DSM web page now offers optimum solutions that meet the investors' expectations and provides the investing public with easy access to past and current information without having to navigate each page separately.

Main Events

- On October 9, 2007, the Council of Ministers adopted a resolution allowing non-Qataris to own up to 49% of the total shares of Masraf Al Rayan. The decision states that all the necessary actions shall be taken into account in accordance with Article (2), Paragraph (4) of Law No. (13) of the Year 2000 regulating non-Qatari investments in the State of Qatar.
- On November 4, 2007, the daily trading value at DSM reached a historic record high of QR 2.02 billion.
- On November 5, 2007, the DSM Price Index climbed to 10,057.59 points, the highest point in 2007.
- An increasing number of family-owned businesses are showing keen interest in transforming their businesses into public shareholding companies and listing their shares at the DSM. In this regard, the DSM listing requirements were amended and two family-owned businesses were admitted after they were legally transformed into shareholding companies. There is a possibility of admitting a third family-owned business with a substantial capital that exceeds QR 4 billion in the near future.

The DSM webpage, on one hand offers optimum solutions that meet investors' expectations and on the other hand provides the investing public with easy access to past and current information without the need to navigate each page separately.

Pin-Wheel Calculator

The 'pin-wheel' from which these calculators take their name is a circular disc or wheel which has nine retractable pins extending radially around the part of its circumference. The pin-wheels and setting rings are assembled into a rotor or cylinder, which rotates forward or backward as the handle is turned. The pin-wheel calculator was a simple and reliable machine, which was capable of all four arithmetic functions. Addition and subtraction were performed directly, while multiplication and division were accomplished by simple procedures involving repeated additions (or subtractions) and carriage shifts.
