Vision

The primary aim of Qatar Exchange is to support Qatar's economy by giving investors a platform through which they can trade fairly and efficiently. The Exchange is part of a comprehensive national strategy that aims to establish Qatar as a world-class international market and reinforce the country's position as a regional financial centre by introducing new trading products, technology and international investors and issuers to Doha.

We are very proud that QE has been the best performing stock exchange in the MENA region for two consecutive years and confident that going forward, QE will continue its success story in line with best international practices.

Chairman's Message

Over the past 15 years since Qatar Exchange was launched on May 27, 1997, we have witnessed much growth and development resulting in remarkable progress that has enabled QE to secure a prominent place within the economy of Qatar. We are very proud that QE has been the best performing stock exchange in the MENA region for two consecutive years and confident that going forward, QE will continue its success story in line with best international practices. Our confidence in the prosperous future of QE is based on the solid foundations of the Qatari economy together with the great vision and wisdom of all who are involved to make QE the organization we see today.

Over the past year, Qatar Exchange has continued the execution of its strategic plan aiming at introducing necessary changes on its infrastructure to transform QE from a local and regional exchange into a world class exchange. QE persisted in its efforts to be in line with the largest and most advanced exchanges in the world through developing legislative framework to enhance transparency and provide different investors with diversified investment tools.

The year 2011 has witnessed structural, organizational and operational developments that set up the appropriate base to

embrace the economic development and prosperity of the Qatari marketplace during the upcoming period. In 2011, QE completed all the technical and regulatory infrastructure required for launching the QE Venture Market, a market dedicated for local and regional SME's. This step was a translation of QE's awareness of the private sector's importance in stimulating the economy, increasing innovation and creativity and contributing to the achievement of economic diversification that the State has adopted. It goes without saying that the launch of the QE Venture Market is a crucial step amid the ongoing development efforts of the Qatar Exchange that will allow entrepreneurs to have the necessary funding, not to mention the attractive opportunities for individual and institutional investors on a local and international level.

The year has also witnessed the trading of Treasury Bills (T-bills) in an important step to diversify investment tools while at the same time the Qatar Exchange has launched the new dividends distribution initiative through transferring dividends directly to the investors' bank accounts, consequently paving the way for investors to easily collect their dividends and reinvest them in any of the successful and promising economy sectors.

In 2011, Qatar Exchange had the privilege to chair the Arab Federation of Exchanges and play a significant role in enhancing the cooperation between the exchanges in the region as exchanges have a vital role in achieving economic and financial development. During this period, Qatar Exchange, guided by the wise directions of the Qatari government, played a significant role in consolidating the mutual cooperation and coordination between the Arab stock exchanges and taking various decisions setting the best forms of integration and cooperation among them.

In view of the fact that QE is an important mainstay in the national economy, QE has persisted in providing local and international investors the best services through focusing on the principles of fairness and transparency, along with laying the foundations of orderly trading. Therefore, we have sought to change legislative and operational frameworks in order to comply with the best international practices and pump the required liquidity into the market in a step to consolidate our leading role in this domain.

Dr. Hussain Ali Al Abdulla
Acting Chairman of QE Board of Directors

The QE Index grew by 1.12% in 2011 and was the only market in the Arab region with positive price return, underpinning the robustness of the Qatari stocks.

CEO's Message

In 2011, Qatar Exchange continued the execution of its development strategy as formulated in 2009 when NYSE Euronext joined the exchange as a partner and shareholder. As in 2010, QE has been able to achieve in 2011 a number of important strategic objectives.

Early 2011 Qatar Exchange extended its trading hours and reduced the tick sizes which positively impacted liquidity while providing greater trading opportunity for investors. By adding half an hour in the morning and half an hour at the end of the trading session, the overlap with Asian and European markets has been enhanced. The new tick sizes have reduced the spreads in the orderbook and provided new liquidity.

In April 2011, QE announced the successful implementation of true DvP (Delivery versus Payment) in order to enhance the efficiency of the settlement process, which is now completely in line with international standards and requirements.

During 2011, QE welcomed the first new members since 2006. QNB Financial Services, CB Investment Services and Ahli Brokerage started brokerage services in 2011. The new members will contribute to the diversity of the brokerage firms that investors can use to access the market.

In October, QE launched an initiative aiming at allowing investors to have their dividends directly deposited in their bank accounts. While this is currently an optional service, the expectation is that in future years this will become mandatory. Using bank transfers obviously enhances the speed and reliability in which investors are able to receive the dividend.

In the fourth quarter, QE, in close cooperation with the regulators, completed all the technical and regulatory infrastructure required for launching the QE Venture Market, a market dedicated for local and regional SME's. In 2012 QE will reach out to market participants, advisors and companies in order to contribute to the development of the SME sector in Qatar.

Closing out the year, QE listed short term T Bills in December, which will attract the attention of banks, financial institutions as well as investors. The presence of a bond market will encourage companies to issue and list bonds as another alternative for financing and ultimately contribute to increasing liquidity in the market. The listing of the T Bills marked the first time in its history that QE traded other financial instruments than shares.

The prevailing impacts of the global financial crisis and the Arab Spring repercussions, both of which affected the investors' confidence in the financial markets in the region and worldwide had a limited impact on the trading volumes. QE has been able to overcome these effects to a large extent. In fact, this can be attributed to the strength of the Qatari economy and the trustworthiness on the Qatari Capital Market and the investors' confidence in the listed companies supported by one of the highest dividends distribution rates in the world; let alone the developed technological infrastructures comparable to those in the advanced markets.

As a result of a sustained endeavor, QE maintained its position as the best performing market in the GCC and Arab region for the second consecutive year. The QE Index grew by 1.12% in 2011 and was the only market in the Arab region with positive price return, underpinning the robustness of the Qatari stocks.

All of our achievements could have not been realized without the efforts of QE's Board of Directors and those working at the capital market institutions. We extend our thanks to them for their continuous support to us because without them we would not be able to fulfill our objectives. On the ground at QE I appreciate the efforts of all who worked with the QE management and all QE employees for their patience, and persistent and sincere efforts during last year and the years before.

André Went
Chief Executive Officer

Mission

- Develop a successful regional and international exchange with strong domestic roots.
- Help develop Qatar into the region’s primary financial centre.
- Offer a diversified range of investment and trading opportunities for investors and members.
- Provide domestic and international investors with access to listed companies based in Qatar and abroad.
- Be an important domestic and regional capital market for issuers to raise capital and for investors to trade securities and derivative products.
- Be a challenging and rewarding place to work.

Best performing equity market in the MENA region in 2010 and 2011

Performance of Qatar Exchange and Index 2011

The global economic outlook and Eurozone crisis obviously had an impact on investor sentiment. This compounded by political events in the region had a major effect on regional and global equity markets throughout 2011, and despite Qatar's undoubted political stability and continued GDP growth, these events caused investors to remain cautious.

Despite this QE maintained its position as the best performing market in the GCC and Arab region for the second consecutive year. The QE Index grew by 1.12% in 2011 and was the only market in the Arab region with positive price return, underpinning the robustness of the Qatari stocks. The year 2011 ended with the total market capitalization of over QR 457 billion. This represents an increase of 1.59% adding over QR 7 billion to total market capitalization from 2010 when the total market capitalization closed at QR 450 billion. At the world stage, Qatar ranked number 8th in terms of total return performance (including dividends) with a total return of about 5.6%.

The first 2 weeks of January saw QE index continue the steady climb that had commenced May 2010. By 16th January the index had reached a 2011 high of 9242.63. Events that unfolded in Egypt in February led the index lower, hitting the year's low at 7489.25 on 3rd March 2011. In the following 10 days the index rebounded sharply to 8457.12 and then gained a further 3.8% by the end of the year. Overall, in 2011 the index gained 1.12%, a stable year in comparison to other regional markets that lost value over the same period.

By sector Banking was the best performer in 2011, delivering 7.96% return. Industrials, Insurance and Services were all down on the year (-1.51%, -7.06%, -9% respectively). Combined with 2010's impressive year, QE Index has delivered 25.6% over the last 2 years.

In addition to the performance of the market, QE accomplished a range of important milestones during 2011. Clients from Qatar as well as across Europe, Asia and the US benefit from the resilience, liquidity and impressive growth of Qatar.

Early 2011 Qatar Exchange extended its trading hours and reduced the tick sizes which positively impacted liquidity while providing greater trading opportunity for investors. In line with its strategy to enhance the market infrastructure and post trade environment, in May 2011 QE announced the successful implementation of DvP (Delivery versus Payment) in order to enhance the efficiency of the settlement process. This was positively received by investors as it enhanced the QE reputation for providing a safe and efficient marketplace allowing investors more confidence in the systems and operations of the exchange. DvP is also a major pre-requisite prior to the launch of other very important business development initiatives in the new products and post-trade areas.

QE was the first exchange in the region to offer full DVP settlement which adds to the eligibility for the upgrade to the MSCI Emerging Markets status. DvP was identified as a requirement by MSCI during June 2010 review for Qatar's qualification as an emerging market.

In 2011 QNB Financial Services, CB Investment Services and Ahli Brokerage started brokerage services, the first new members since 2006.

In October, QE launched an initiative aiming at allowing investors to have their dividends directly deposited in their bank accounts.

The exchange has been engaging with its regulator to move forward with several different initiatives, including DMA (Direct Market Access), SLB (Securities Lending and Borrowing), LP (Liquidity Provision) and Margin Trading. Whilst this is still 'work in progress' it should be noted that when adopted, these initiatives should provide even greater liquidity to QE and its investors.

Closing out the year, QE listed short term T Bills which will attract the attention of banks, financial institutions as well as investors. The presence of a bond market will encourage companies to issue and list bonds as another alternative for financing and ultimately contribute to increasing liquidity in the market. This underlines QE's ability to list and trade different asset classes and diversify the investment opportunities that it offers to all QE market participants.

The first National Development Strategy (NDS) for the State of Qatar 2011-2016 was prepared to set a path towards achieving the goals of Qatar National Vision 2030. Diversification and development of the financial services sector along with health, education and tourism is on top of the agenda of the National Development Strategy 2011-16.

On back of the NDS and as a buildup towards FIFA World Cup 2022, huge infrastructure development projects will require funding from domestic sources. This provides opportunity to further strengthen public-private partnership, SME development and develop the debt capital market. Established corporates will also tap capital markets to fund their expansion plans to contribute to the growing economy and project needs.

The coming period not only provides opportunities for issuers but also for investors alike.

Events and Achievements at Qatar Exchange

The year 2011 was full of important events for Qatar Exchange, which occurred in parallel with the implementation of QE's plans and new initiatives based on the investment in human resources and the enhancement of the technological and regulatory environments.

QE focused on the parties dealing with the exchange, especially the investors through enhancing and enforcing the principles of disclosure, transparency, and fair trading. The QE also developed all means to raise their investment awareness and improve the relevant regulations. The most prominent events and achievements in 2011 are as follows:

EVENTS

Enhancing Investors' Awareness

As part of QE's ongoing campaign to raise investors' awareness in terms of the best investment practices, QE management held several seminars and workshops and participated in external events and cooperated with various educational parties focusing on investors' awareness and promoting the QE as an important provider of investment opportunities.

In 2011, QE participated in the following conferences and events in Qatar and abroad:

- **Qatari Officials Ring NYSE Closing Bell to Highlight Successful Partnership between NYSE Euronext & Qatar Exchange**

The Qatar Exchange was invited by their strategic partners, NYSE Euronext to ring the closing bell of the NYSE on Monday January 3, 2011, the first day of trading in the new year. Qatar Officials

participated in the ceremony of ringing the closing bell of New York Stock Exchange in highlighting the successful partnership between NYSE Euronext (NYSE) and Qatar Exchange (QE).

- **Qatar Exchange holds meetings with global investment institutions on, SFTI and investment opportunities in Qatari market**

In collaboration with NYSE Euronext, a series of joint meetings were held in London and Paris between senior officials from Qatar Exchange and representatives of international investment banks in order to brief them about the benefits of investment in Qatar as an ideal investment destination. These meetings focused on the connectivity between Qatar Exchange and global markets in London, Paris and New York through the SFTI network.

- **Bonds and Sukuk Introductory Seminar**

As part of QE's campaign aiming at raising awareness among investors before the proposed listing of bonds and sukuk in the market, QE held a seminar to educate the investors and interested people about the trading and characteristics of bonds and sukuk. The seminar was held on March 23rd 2011 at the Ministry of Business and Trade and was attended by a large number of investors, interested people and media reporters.

- **Qatar Career Fair**

In implementation of the Qatarization policy adopted by the Qatari Government, QE effectively participated in the QCF, which was opened by HH Sheikh Tamim Bin Hamad Bin Khalifa Al Thani, Heir Apparent, and held in the period from 10-14 April 2011.

- **Arab Federation of Exchanges Council Meeting**

Qatar Exchange organized the Arab Federation of Stock Exchanges (AFE) Council Meeting, which was held at the Four Season Hotel in Doha with the attendance of the heads and directors of most Arab stock exchanges. During the meeting, the Federation's Chairmanship was moved to the State of Qatar represented by Qatar Exchange and Dr. Hussain Al Abdulla, Acting Chairman of QE's Board of Directors.

- **MEED Infrastructure Conference**

Qatar Exchange participated in the infrastructure conference, which was held on 5 July 2011. The conference focused on the needs of the infrastructure projects in the State of Qatar. QE's representatives participated within the QFMA's team and discussed the funding needs of such infrastructure projects.

- **SunGard London Day**

Qatar Exchange participated in the SunGard Exhibition held on 6 July in London. SunGard is a multinational company, which provides electronic trading systems allowing brokers for Direct or Remote Market Access. QE's booth received many visitors and corporate representatives who were briefed about the Qatari economy and the capital market.

- **Qatar Exchange Held Investment Forum in New York between Listed Companies & International Investors**

Qatar Exchange (QE) participated in a two-day forum, which was held in New York from Nov 15-16 during which several meetings were held between the companies listed on QE and investment fund managers to support the further development and practice of QE's listed companies' investor relations. The forum, organized in cooperation with Morgan Stanley, was designed to complement the companies' ongoing investor relations activities through providing an opportunity for the senior management of listed companies to meet key decision makers from a number of the world's largest international fund managers.

ACHIEVEMENTS

The year 2011 bore witness to large number of major achievements, the most important of which are the following:

- **For the second consecutive year Qatar Exchange best performing market in the region**

Qatar Exchange is pleased to announce that it has maintained its position as the best performing market in the GCC and Arab region for the second consecutive year. The QE Index grew by 1.12% in 2011 and was the only market in the Arab region with positive price return, underpinning the robustness of the Qatar economy. The year 2011 ended with the total market capitalization of over QR 457 billion. This represents an increase of 1.59% adding over QR 7 billion to total market

capitalization from 2010 when the total market capitalization closed at QR 450 billion. At the world stage, Qatar ranked number 8th in terms of total return performance (including dividends) with a total return of about 5.6%.

- **Modifying Trading Hours and Tick Sizes and QE**

On February 1st 2011, Qatar Exchange has modified the daily trading hours and tick sizes at Qatar Exchange. The pre-opening phase will be between 9:00 hrs and 9:30 hrs., and the continuous trading phase will be followed by a 15-minute period, divided into 10 minutes for the pre-closing period and 5 minutes for the trading at last period.

- **QE launched a new mechanism to facilitate dividends payment to investors**

On 23rd October 2011, Qatar Exchange launched an initiative aiming at allowing investors to have their dividends directly deposited in their bank accounts. The purpose of this initiative, which comes in line with the best international practices, is to help develop the Qatari financial market and protect investors' rights. To this effect, investors will be requested to visit their bank to provide the necessary instructions to ensure getting the dividends through their bank accounts. QE has provided all banks with forms, which will be required to fill out by investors to include their bank account information.

- **Qatar Exchange joins BT Radianz Global Community**

On November 16th 2011, Qatar Exchange joined BT Radianz, which will make Qatar Exchange's market data feeds accessible by the BT Radianz Cloud community of thousands of international banks, brokers, global exchanges and investment managers. This will provide investors globally with fast, neutral, comprehensive, integrated, updated, cost-effective and secure access to information about investment opportunities in Qatar and the Middle East.

- **Launching the First Debt Instrument in the Market**

On December 29th 2012, Qatar Exchange announced its technical and regulatory readiness to list short-term T-bills issued by the Qatari Government.

- **Banks re-enter market as brokers**

In 2011 QNB Financial Services, CB Investment Services and Ahli Brokerage started brokerage services, the first new members since 2006.

Cooperation with Educational Parties

Pursuant to the decision of H.H Sheikh Tamim Bin Hamad Bin Khalifa Al Thani, Heir Apparent and Chairman of the Supreme Education Council, No. (1) of 2008, regarding the schools code of ethics requiring all students of independent and ministry schools to join a public institution for at least 25 hours of service; QE continued its school students training and internship program, which was started in 2008. As a result of the program, many students were introduced to QE activities and departments through spending one hour daily in each department in order to make them acquainted with the investment opportunities at QE's and allow them to acquire the skills and knowledge required for their career life.

Receiving Students Delegations

In 2011, QE received several students delegations from all educational stages. The students were briefed about QE's activities, investment opportunities, achievements and development.

QE also participated in the Ministry of Labor's vocational guidance campaign, which targeted the secondary school students in the State of Qatar.

QE's Publications

In 2011, QE produced the following publications:

- Monthly reports
- 2010 Annual Report
- Investors' Guide
- Work at QE Guide, which was issued for Qatar Career Fair. The guide includes an overview and the advantages on working at QE.
- Importance and Advantages of Listing at QE
- Advantages and Enhancement of New Trading System
- Characteristics of New Trading System
- Brochure on QE's new website
- Corporate governance rules for QE's listed companies
- How to list in QE
- New Dividends Payment Mechanism
- Introduction on T-Bills and their Market
- T-Bills in Qatar Exchange
- Introduction to Bonds and the Bond Market

* ABQK : Ahli United Bank (Bahraini Bank) is a strategic partner with Al Ahli Bank Of Qatar with 40% ownership of the capital. Hence, the Non Qataris Cannot buy until the Bahraini Bank will sell a portion of their ownership or ABQ increases the FOL to than 40 %.

** KCBK: There are 3 categories of investors at Al khali Bank. First, the Qatari nationals whereby their ownership should never be less than 51% of the bank's capital as per the Articles of Association.

The second is the citizens from (Kuwait, Oman, UAE, Bahrain) who can own up to 49 % of the bank's capital. The third category is the other nationalities that can own up to 25 % of the free float of the company.

*** QGR: Some investors used to hold the Qatari nationality and then changed their nationality later on and as a result of the change the actual ownership at this stage might be more than 25% of free float.

**** QGMD : Qatar German For Medical Devices the maximum individual ownership limit for Non-Qatari investors is 10% of the capital i.e., 1,155,000 shares.

*****QOIS: The Articles of Association of the company stipulate that the Omani nationals can subscribe up to 9 Million shares out of 30 Million share capital during the IPO plus 6 Million shares were reserved for the Government of Oman. Same is the case for Qatari nationals. Hence the Omani and Qatari nationals can own 9 million each from the free float. The third category of investors is NonQatari-NonOmani who can own up to 25 % of the free float which is 4.5 Million shares.
